This means that a player can jump into another player's backpack if the situation becomes too difficult for them, then jumps back after security. Think about it as a kind of food chain. From the beginning, you will realize that this is not a normal bandicoot game. There are also Voodoo dolls that you can find lying down or getting certain tasks. It is also the only way to control creatures and the larger boss. You can change the backpack option from Lapfrog to Piggyback. Control The abnormal arrests feel very different from what you could use from the previous game. You can also jump from a mutant to another mutant, until the second is unconscious. You can play as an abnormal stops and use the desired mutant anywhere, including the garment. The titan accident is more similar to the rate of the rhythm ", rather than the previous platform. Leapfrog is set by default. The effect is temporary and will be lost immediately if used on mutant that can be positive. Jackerable.
